ASSIGNMENT – 01

BANK LOAN APPLICATION FORM — BASIC FIELDS USE CASE

NAME:Nethra Chandragandhi T
Roll No:240701357
Dept:Cse

1. Objective

To design and build a functional **Bank Loan Application Form** application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder, while solving a real banking requirement of collecting and pre-screening loan applications in a structured manner.

2. Problem Statement

A bank branch currently accepts loan applications through paper forms filled at the counter, leading to illegible handwriting, incomplete income details, and delays in routing applications to the correct loan officer based on loan type. There is no digital pre-screening step before the applicant is called in for document verification.

The proposed system is a low-code application using Zoho Creator that allows a prospective borrower to submit a loan application enquiry through a single online form. The form captures personal identity, contact details, employment and income details, loan requirements, existing liabilities, and consent for a credit check using all Basic Field types provided by Zoho Creator's Form Builder.

3. Scope of the Use Case

Application Name: Loan Application & Pre-Screening Management
Form Name: Loan_Application_Form
Primary Users: Prospective borrowers / Bank loan officers
Report View: Loan_Application_Report

The objective of the report is to enable loan officers to filter, pre-screen, and route applications for document verification and approval.

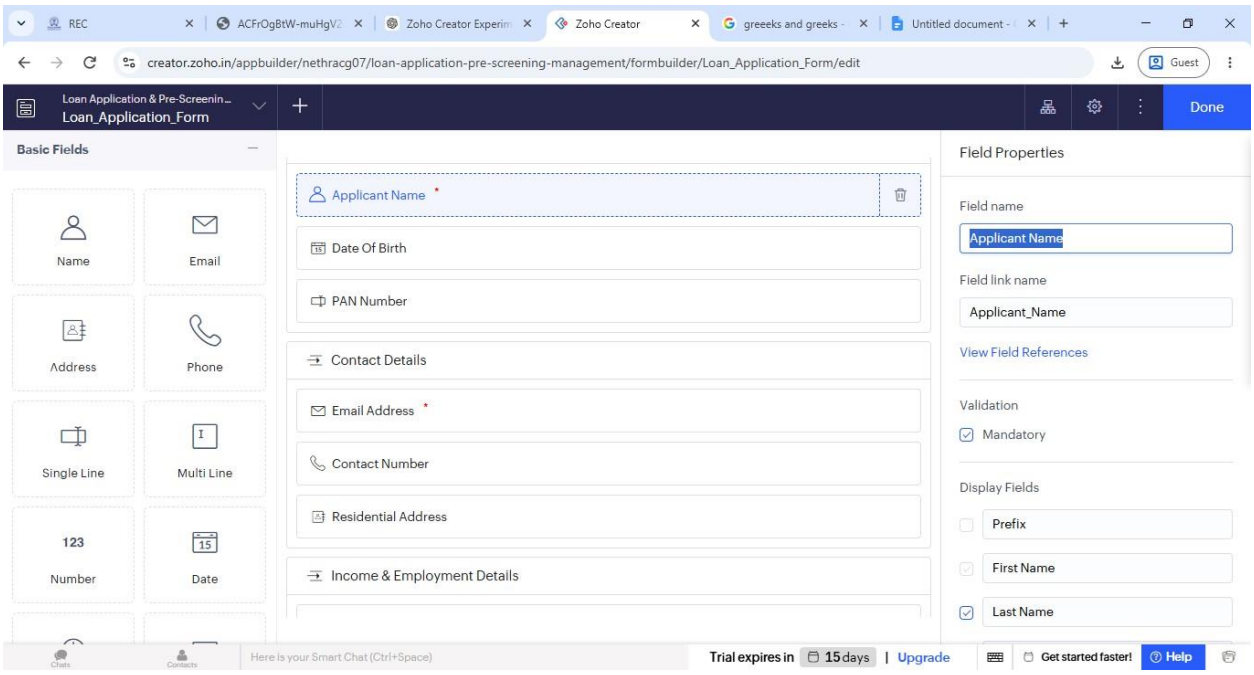

---

4. Basic Fields Used and Their Mapping

S.N	Basic	Form Field Name	Purpose	Sample Value o	Field
1	Name	Applicant_Name	Captures the full name of the applicant	Suresh Raghavan	
2	Email	Email_Address	Captures a email address for status updates	suresh.raghavan@example.co	validated m
3	Address	Residential_Address	Captures the residential address	18, Lake View Road, Trichy, TN, 620001	applicant's
4	Phone	Contact_Number	Captures a validated mobile number	+91 94430 22110	
5	Single Line	PAN_Number	Captures PAN or short text information	ABCDE1234F	
6	Multi	Purpose_Of_Loan	Captures the the requested loan	Home renovation and purchase	Line purpose of furniture
7	Number	Monthly_Income	Captures the applicant's monthly income	55000	
8	Date	Date_Of_Birth	Captures the applicant's date of birth	22-Jan-1990	
9	Time	Preferred_Callback_Time	Captures preferred callback time	5:00 PM	
10	Drop	Loan_Type	Allows	Home Loan	

		Down		selection of a single loan product
11	Radio	Employment_Type	Captures	Salaried employment category
12	Multi Select	Existing_Liabilities	Captures	Car Loan, Credit Card Dues existing loans or financial commitments
13	Checkbo x	Consent_For_Credit_Chec k	Captures	Checked (Agreed) consent for credit bureau verification

The above field mapping follows the 13 Basic Fields and sample values specified in the assignment.

5. Form Layout

Section A – Personal Details

- Applicant Name (First Name, Last Name)
- Date of Birth
- PAN Number

Section B – Contact Details

- Email Address
- Contact Number
- Residential Address

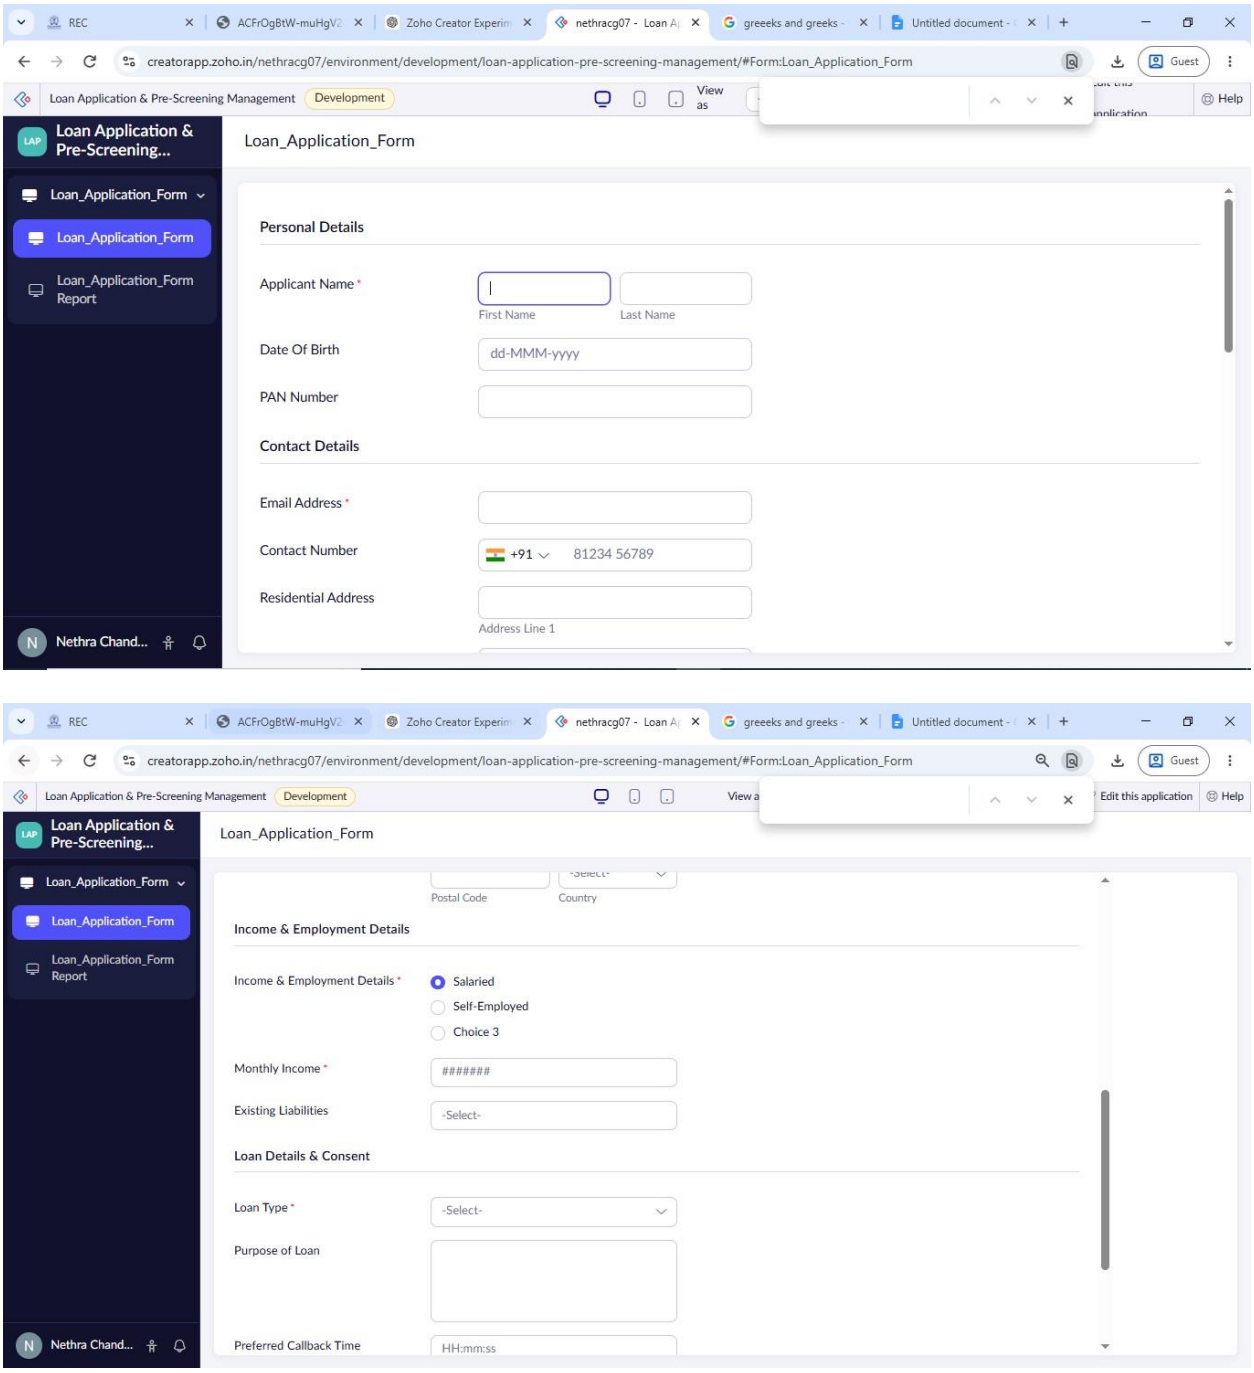

Section C – Income & Employment Details

- Employment Type
- Monthly Income
- Existing Liabilities

Section D – Loan Details & Consent

- Loan Type
- Purpose of Loan
- Preferred Callback Time
- I consent to a credit bureau check

This section-wise arrangement follows the specified form layout.

6. Validation Rules

The following validation rules are configured in the Loan Application Form:

1. Applicant Name must be a mandatory field.
2. Phone Number must be a mandatory field.

3. Date of Birth must be a mandatory field.
4. Employment Type must be a mandatory field.
5. Loan Type must be a mandatory field.
6. Monthly Income must be a mandatory field.
7. Credit Check Consent must be mandatory.
8. Email Address must follow a valid email format.
9. Contact Number must use the appropriate Indian country-code format.
10. Monthly Income must be greater than 0.
11. Date of Birth must ensure that the applicant is at least 18 years old.
12. The form cannot be submitted without credit-check consent.

---

7. Workflow

The workflow of the Loan Application & Pre-Screening Management application is as follows:

Step 1: The applicant opens the public loan application form through the bank website or branch QR code.

Step 2: The applicant enters personal, contact, employment, income, loan, and callback details.

Step 3: The applicant submits the form. Zoho Creator validates all mandatory fields and configured formats.

Step 4: After successful submission, a new record is created in the **Loan_Application_Report**.

Step 5: An acknowledgement email is sent to the applicant using the email address provided in the form.

Step 6: The loan officer reviews the report, filters applications based on Loan Type and Monthly Income, and contacts the applicant at the preferred callback time for document verification.

---

8. Sample Record

Applicant Details

Applicant Name: Suresh Raghavan
Email Address: suresh.raghavan@example.com
Contact Number: +91 94430 22110
Residential Address: 18, Lake View Road, Trichy, TN, 620001

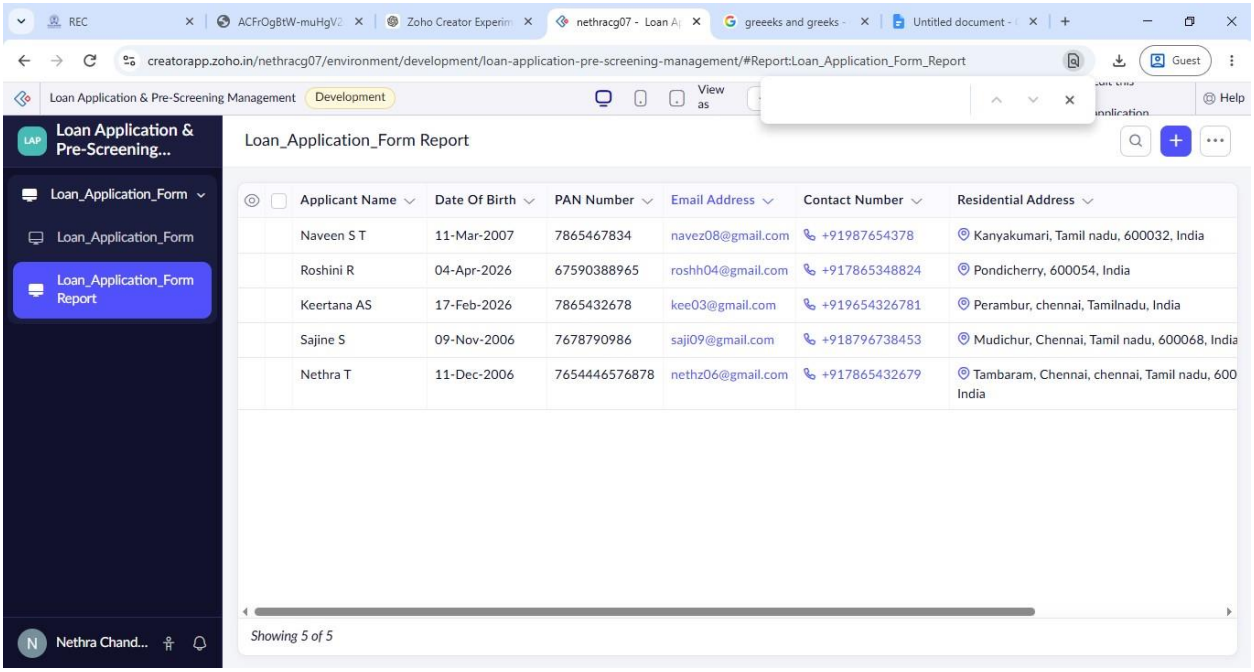

PAN Number: ABCDE1234F **Date of Birth:** 22-Jan-1990

Employment & Income Details

Employment Type: Salaried **Monthly Income:** ₹55,000
Existing Liabilities: Car Loan, Credit Card Dues

Loan Details

Loan Type: Home Loan
Purpose of Loan: Funds required for home renovation and furniture purchase.
Preferred Callback Time: 5:00 PM **Credit Check Consent:** Yes / Checked

---

9. Expected Learning Outcomes

After completing this experiment, the student will be able to:

- Understand the purpose and correct use of each Basic Field in Zoho Creator.
- Structure a financial services form into logical and applicant-friendly sections.
- Configure field-level validations such as mandatory, format, and range checks.
- Understand how form field values are transferred to report views.
- Understand the basic pre-screening workflow for loan applications.

---

10. Deliverables

The following deliverables are completed as part of this lab exercise:

1. **Loan_Application_Form** created in Zoho Creator with all 13 Basic Fields.
2. Required field validations configured.
3. **Loan_Application_Report** generated for submitted applications.
4. At least three sample loan application records submitted.
5. Screenshot of the Form Builder showing all 13 fields.
6. Screenshot of the live preview of the form.
7. Screenshot of the report containing at least three submitted records.

---

11. Conclusion

The **Bank Loan Application Form** was successfully designed and implemented using Zoho Creator. The application demonstrates the use of all thirteen Basic Fields, field-level validations, report generation, and a basic loan application workflow. It provides a structured digital method for collecting loan enquiries and helps loan officers review and pre-screen applications efficiently.
