EXP:09 – BLUEPRINT USING ZOHO CREATOR

(INTERNSHIP MANAGEMENT SYSTEM)

1. Aim

To create and configure a Blueprint in Zoho Creator for the Internship Management System to represent the stages and transitions involved in reviewing internship applications.

2. Procedure

1. Open the Internship Management System in Zoho Creator and select the Workflow tab.
2. Choose the Blueprints section and select the Internship Application form.
3. Create a blueprint named “Internship Application Process.”
4. Add the application stages and connect them with transitions to represent the review, selection, and rejection process.
5. Configure the transitions between the stages and save the blueprint.
6. Enable the blueprint and review the stages, transitions, and blueprint status.

3. Blueprint Configuration

The blueprint created for the Internship Application form is named “Internship Application Process.” The visible flow begins at Start, proceeds to Applied, and then uses the Review Application transition to reach Under Review. From Under Review, the application can move through Select Application to Selected, or through Reject Application to Rejected.

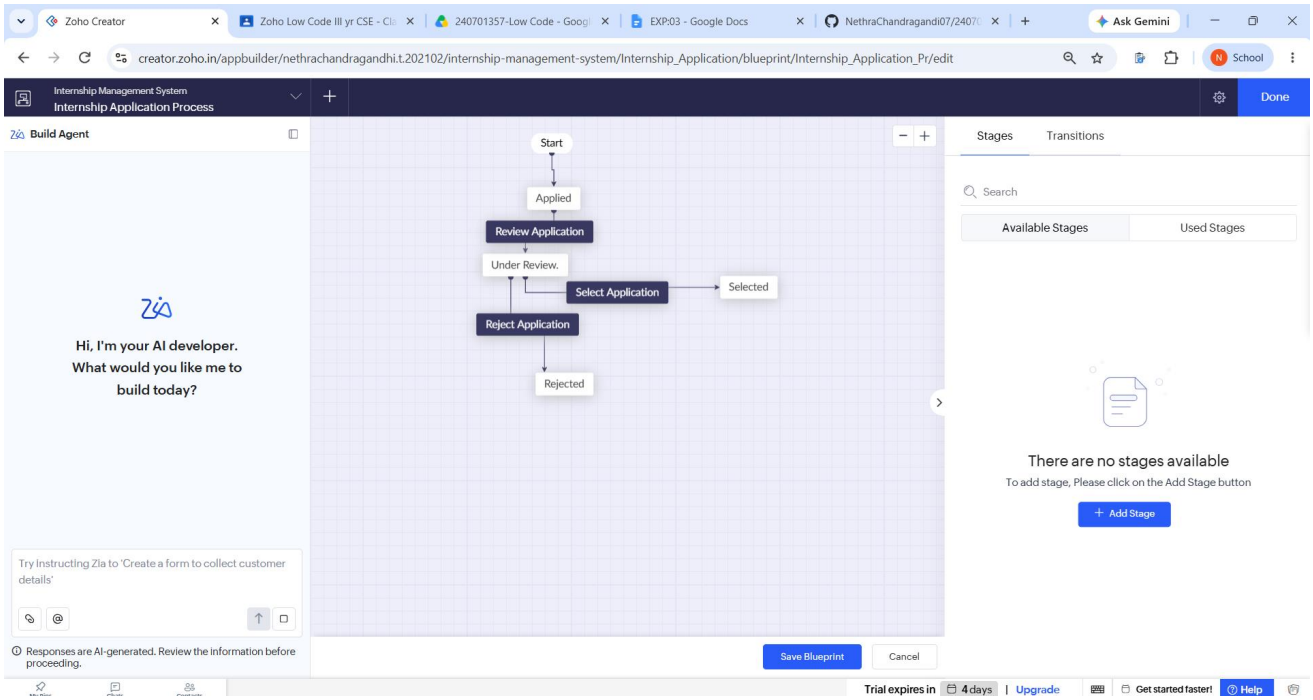

Figure 3.1: Internship Application Process blueprint stages.

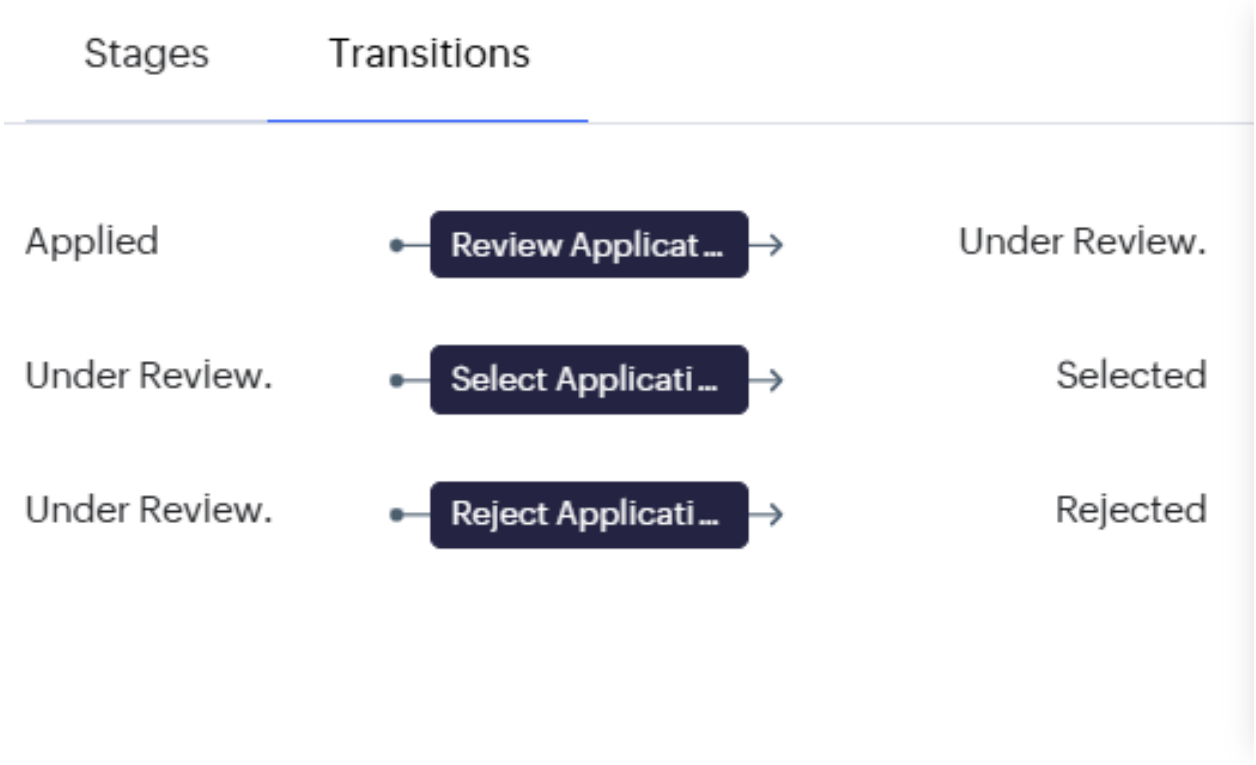

Figure 3.2: Blueprint transitions between application stages.

4. Stages and Transitions

Stages shown in the blueprint:

- Applied – the application has been submitted.
- Under Review – the application is being reviewed.
- Selected – the application has been selected.
- Rejected – the application has been rejected.

Transitions shown in the blueprint:

- Review Application: Applied → Under Review.
- Select Application: Under Review → Selected.
- Reject Application: Under Review → Rejected.

5. Blueprint Status

The Blueprint list in Zoho Creator displays “Internship Application Process” with its status set to Enabled.

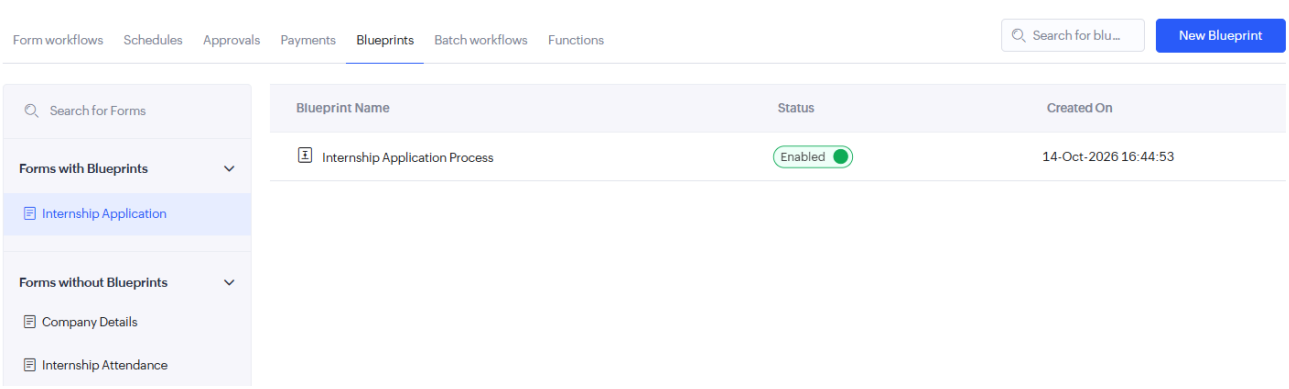

Figure 3.3: Blueprint listed as enabled in Zoho Creator.

6. Result

The Internship Application Process blueprint was created for the Internship Application form. The stages Applied, Under Review, Selected, and Rejected were connected through the Review Application, Select Application, and Reject Application transitions. The blueprint list showed the process as Enabled.

7. Conclusion

The Blueprint feature in Zoho Creator provides a visual way to define and manage an application's progress through defined stages. This blueprint organizes internship application review and decision-making into a clear process.
