EXP:10 – SCHEDULES USING ZOHO CREATOR

1. Aim

To create and configure custom schedules in Zoho Creator that execute predefined actions at scheduled dates and times for the Internship Management System.

2. Procedure

1. Open the application in Zoho Creator and select the Workflow section.
2. Open the Schedules tab and create custom schedules.
3. Configure the schedule name and its execution date and time.
4. Add the required action to each schedule. In the screenshots, the action is configured to send an email to the Zoho admin user ID.
5. Save and enable the schedules, then verify that they appear in the custom schedules list.

3. Schedules Created

Two custom schedules are shown in the application:

3.1 Daily Pending Application Check

Scheduled execution: 15-Oct-2026 at 09:00:00. The schedule contains one action: send an email to zoho.adminuserid. Its status is Enabled in the schedule list.

3.2 Monthly Internship Summary Reminder

Scheduled execution: 01-Nov-2026 at 09:00:00. The schedule contains one action: send an email to zoho.adminuserid. Its status is Enabled in the schedule list.

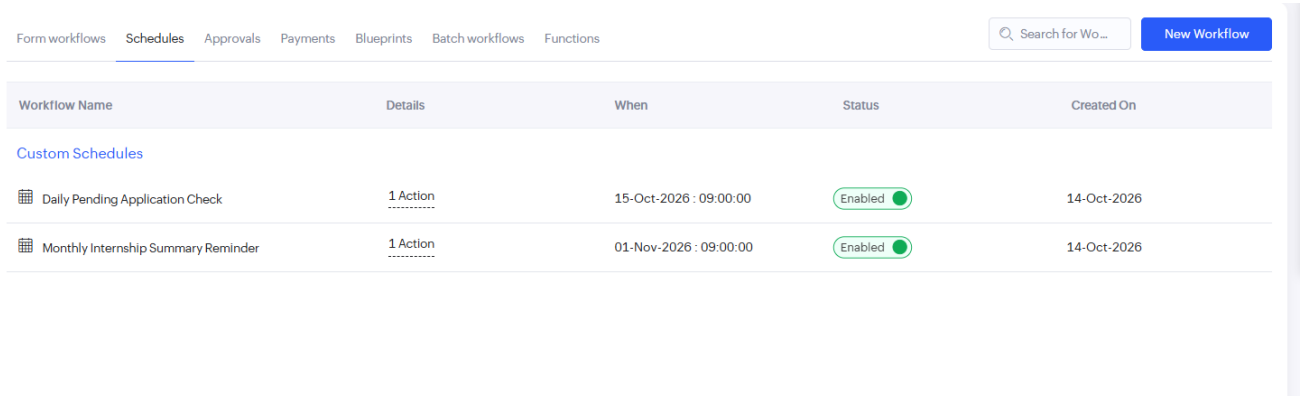

Figure 10.1: Custom schedules configured in Zoho Creator.

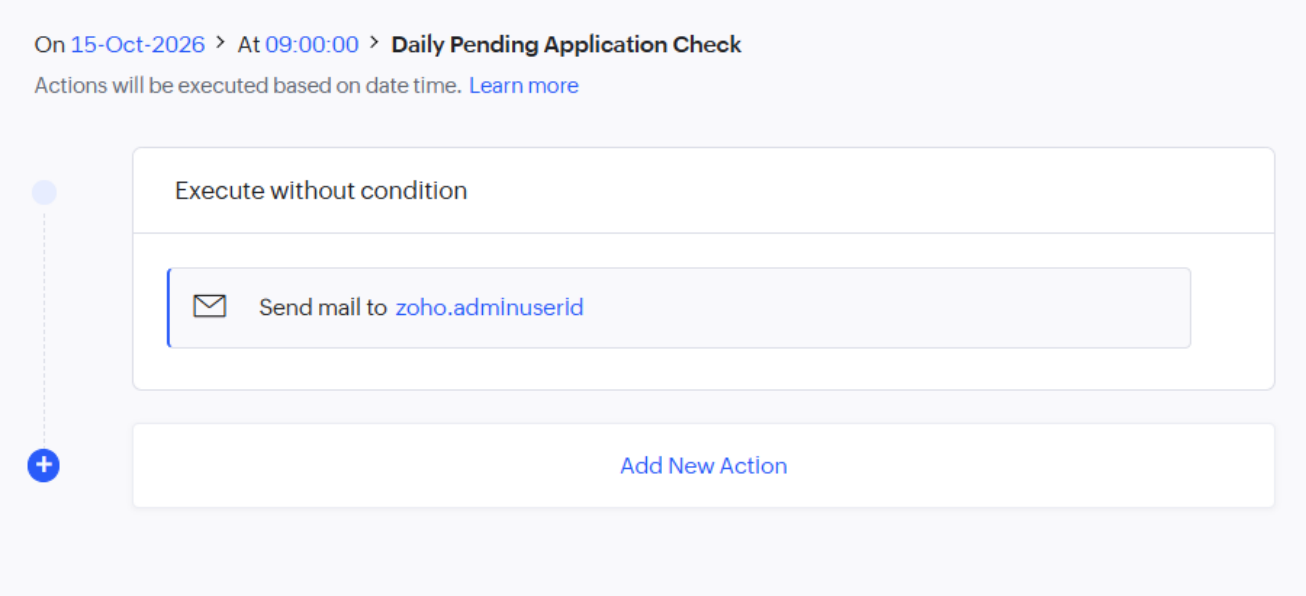

Figure 10.2: Daily Pending Application Check schedule and its email action.

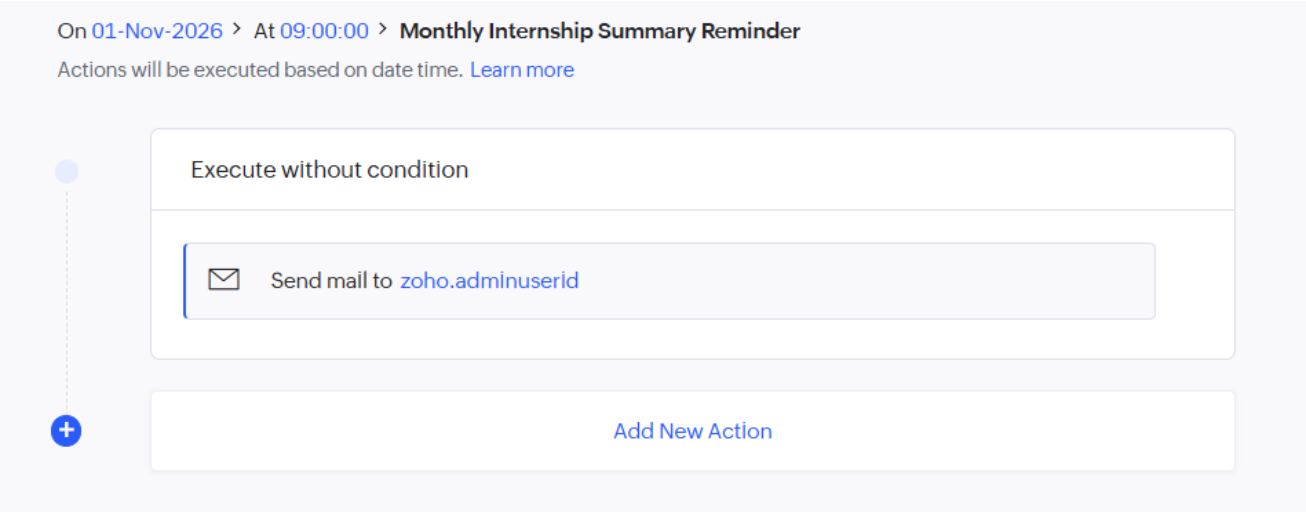

Figure 10.3: Monthly Internship Summary Reminder schedule and its email action.

4. Result

Two custom schedules—Daily Pending Application Check and Monthly Internship Summary Reminder—were configured in Zoho Creator. Each schedule contains one email action directed to the Zoho admin user ID, and both are displayed as Enabled.

5. Conclusion

Zoho Creator schedules can run configured actions at specified dates and times. In this application, the schedules are set up to send email reminders for pending application checking and monthly internship summary follow-up.
