EXP 12 – APPROVAL ACCESS IN ZOHO CREATOR

Aim

To configure and test the approval process in Zoho Creator for managing internship applications.

Software Required

- Zoho Creator
- Web Browser

Procedure

1. Open the Internship Management System in Zoho Creator.
2. Navigate to Workflow → Approvals and open the Internship Application Approval Process.
3. Review the Level 1 Approver configuration.
4. Configure the Approve and Reject actions for submitted internship applications.
5. Review the email actions configured for the approval events.
6. Open the application in the development environment and navigate to Approvals → Pending Tasks.
7. Verify that a submitted application appears with its Application ID, Student Registration, and Company Details.

Implementation

The approval process is configured for the Internship Application form. The approver can review submitted applications and use the available approval actions.

- Approve: processes an application accepted by the approver.
- Reject: processes an application rejected by the approver.
- Email notification: sends an email as configured for the approval event.
- Pending Tasks: displays applications awaiting review.

Screenshots

Screenshot 1: Approval Workflow Configuration

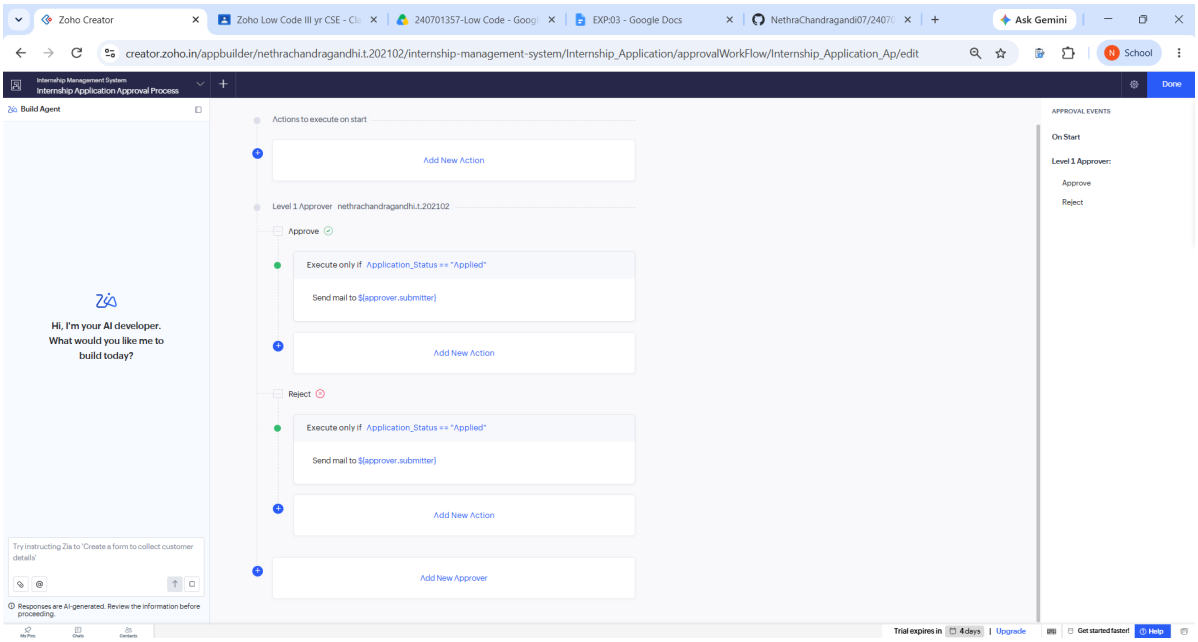

Figure 1 shows the Level 1 Approver and the configured Approve and Reject events with email actions.

Screenshot 2: Pending Approval Tasks

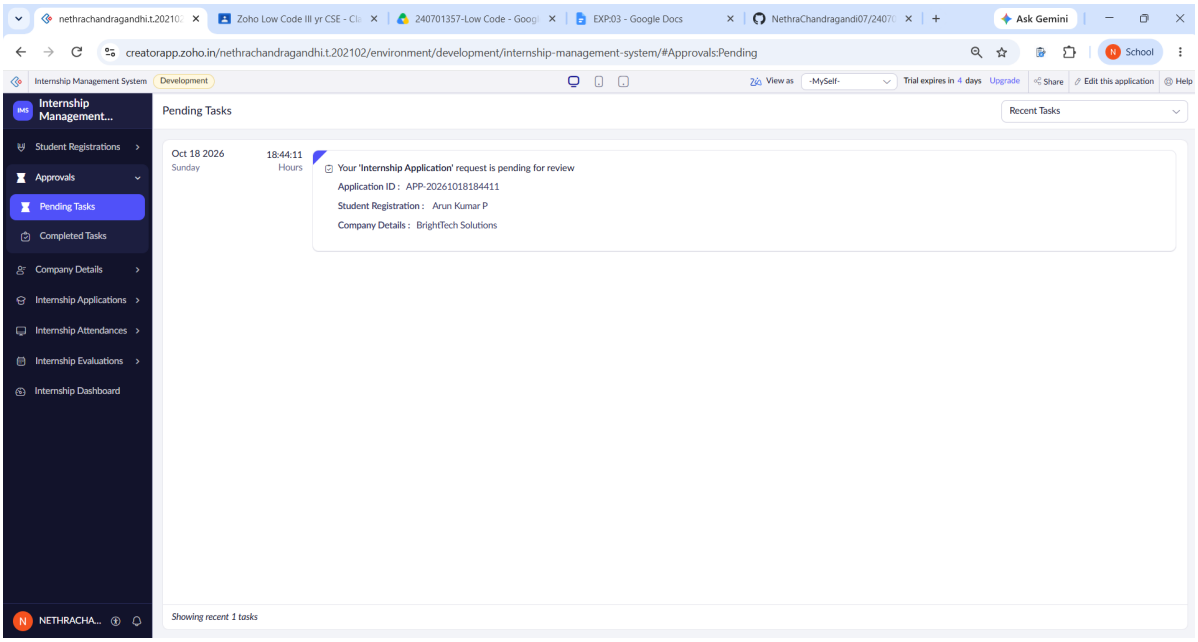

Figure 2 shows a submitted internship application displayed in the Pending Tasks section for review.

Result

The approval process was configured in Zoho Creator, and a submitted internship application was displayed in the Pending Tasks section for review.

Conclusion

The approval feature provides a structured way to review internship applications and manage approval decisions within the application.
